DTU 100

■ The desktop unit DTU 100 combines high convenience and ease of use with the fascinating possibilities of spatial imaging.

■ By an ingenious assembly system, the number of control elements is restricted to the beamer basic functions (zoom, focus ...) Nevertheless, a precise adjustment of the two images is reached which enables the equipment to be operated in a dual mode, alternatively stereo and mono. This is done without cumbersome connection changes.

Technical data of the basic system:

Panel	3 x 1" TFT p-Si (Microlens)
Brightness	3500 ANSI Lumen
Contrast Ratio	900 : 1
Resolution	1024 x 768 (XGA)
Lensshift	verticale
Color systems	PAL, SECAM, NTSC
